# Catering Utrecht Library

There are two catering locations in the Utrecht Library: Meneer Potter and NODA. Besides operating the two locations, Vineyard is the catering partner of the library for meetings in the conference rooms. In this foodbook, you will find an overview of the products we offer, internationally inspired and based on the different seasons, with many local or regional products. This foodbook consists of meeting packages, lunch, snacks and dinner for events, meetings and breaks. The 'standard' menu is vegetarian, but upon request, we can offer a vegan menu. A menu with meat or fish is also possible.

## Meneer Potter

Meneer Potter is located on the ground floor, adjacent to the main hall. It is a city café where you can go for breakfast, lunch, (early) dinner, drinks & cocktails. So at any time of the day.

## NODA

NODA is located on the second floor of the library. NODA is a free, inspiring place with a worldly character. It is located in the heart of the city. And also in the heart of the Library. You can go there for a nutritious lunch, a high tea or drinks & bites. With a unique view over the Oudegracht.

Something to celebrate? Looking for a nice, centrally located place for a Christmas dinner, farewell drink, New Year's lunch or anniversary? We look forward to welcoming you and your guests at NODA or Meneer Potter

Curious about the possibilities? Send us an e-mail at [info@vineyardneude.nl](mailto:info@vineyardneude.nl) or call 030-2028004, we will be happy to send you a quotation.

# We stand for a delicious and honest meal with an reducing carbon footprint

## We go for local food

We avoid long chains in which there are often poor working conditions. And avoid regions where the environment is not taken very seriously. By sourcing locally with less transport, CO2 emissions are much lower.

## We serve seasonal products (not from the greenhouse)

Fruit and vegetables have the least impact on the environment during their 'own' season. In addition, seasonal products are healthier and fuller in taste. By serving seasonal products (not from the greenhouse), our food has a small carbon footprint.

## We support the protein transition

Animal proteins have a much higher carbon footprint than vegetable proteins. By using proportionately fewer animal products, the footprint per meal becomes smaller, and moreover, we save unnecessary animal suffering.

## We do not waste anything

Throwing food away is not only a waste, because someone else could have eaten it. If 50% has to be thrown away, the carbon footprint of the meal is 2x higher than necessary. Less waste, so it's better for you .

## We stimulate healthy choices

We make the choice for healthy food easy and attractive, for our guests and colleagues. We do this, among other things, by offering the right ratio of healthy products / guilty pleasures, by reducing salt, saturated fat and sugar by means of clear communication.
