Catering Utrecht Library

Within Utrecht Library, you'll find two hospitality locations: Meneer Potter and NODA. In addition to operating these venues, Vineyard is also the library's catering partner for meetings and events held in the various rooms. In front of you is the foodbook, featuring a varied selection of internationally inspired dishes, based on the different seasons and made with as many local or regional products as possible. The foodbook is structured around the most common culinary moments during events and gatherings: welcome and break moments, lunches, drinks, and dinners.

The standard offering is vegetarian, but vegan options or dishes with meat or fish are of course available upon request.

Meneer Potter

Meneer Potter is located on the ground floor, adjacent to the central hall. It's a city café where you can go for breakfast, lunch, (early) dinner, drinks, and cocktails — at any moment of the day.

NODA

NODA is located on the second floor of the library. It is a free, inspiring place with a worldly character — a place with a warm heart for everyone. Situated in the heart of the city, and right in the heart of the Library building. You can visit for a nourishing breakfast, an extensive lunch, or a nice drink — all with a unique view over the Oudegracht.

Something to celebrate?

Looking for a fun, centrally located place for a Christmas dinner, farewell drinks, New Year's lunch, or anniversary celebration? Groups (large or small) are more than welcome, and it is also possible to rent out Meneer Potter or NODA for your event.

Curious about the options? Email info@vineyardneude.nl or call 030-2028004 — we'll be happy to send you a quote.

We stand for an honest, delicious meal with an ever-lower carbon footprint.

We choose local food

We avoid long supply chains that often involve poor working conditions, as well as regions where environmental standards are not strictly followed. By sourcing locally with less transportation, CO₂ emissions are significantly lower.

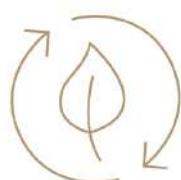

We serve seasonal products (not from greenhouses)

Fruits and vegetables have the least environmental impact during their 'natural' season. In addition, seasonal products are healthier and more flavorful. By serving seasonal products (not from greenhouses), our food maintains a small carbon footprint.

We support the protein transition

Animal proteins have a much higher carbon footprint than plant-based proteins. By using proportionally fewer animal products, the footprint per meal is reduced, and unnecessary animal suffering is avoided.

We waste nothing

Throwing away food is not only a shame because someone else could have eaten it. If 50% of the food is wasted, the meal's carbon footprint is twice as high as necessary. Less waste is better for the climate.

We encourage healthy choices

For our guests and colleagues, we make choosing healthy food easy and appealing. We do this by offering the right balance of healthy products and indulgent treats, and by reducing salt, saturated fat, and sugar through clear communication.
